### **OLD BUSINESS**

1. President Johnson advised that we are waiting on Fayetteville FD to finalize their digital system with Motorola. They have encountered some technical difficulties and Motorola is working out the issues. Once complete and all their talk groups are finalized we will upgrade our system. We are required to be interoperable not just locally but also regionally and that is our goal. If there is any department that has pressing needs prior to our county-wide upgrade they should contact Motorola to see what they can work out directly with Motorola.
2. Assistant Fire Chief Dove provided a quick update on Chief Harris's wife who is currently hospitalized. Please continue to remember the Harris family in our thoughts and prayers.
3. President Johnson re-emphasized the up-coming legislative day in May 2015 in Raleigh. Please put this on your calendar and lets sent as many men or woman to the Raleigh on the 6<sup>th</sup> of May as possible.

### **NEW BUSINESS:**

1. Assistant Fire Chief Williams Spring Lake Fire Department on behalf of Chief Mc Lamb announced that there will be an upcoming Firehouse Software Upgrade but everyone will be notified prior to the actual upgrade to our server.
2. Fire Chief Bill Bullard, Stedman announced that he is retiring at the end of March and introduced his replacement Fire Chief Justin Nobles. Chief Bullard thanked the association for their friendship and assistance over the years. President Johnson welcomed Chief Nobles to the Association. Chief Nobles had previously served as the Assistant Chief for Stedman FD. President Johnson stated that the association will be represented during Bill's Farewell Reception and will be presented with the Standard Association Plaque.
3. Fire Chief Harold Shirley, Beaver Dam Fire Department provided a quick update on Station 27 and introduced his new Assistant Chief Gary Brock. President Johnson welcomed Assistant Chief Brock to the Association. Chief Shirley also announced that the department will be hosting an open house at Station 27 in the very near future and he would send out flyers to everyone. The department is located on Turn Bull Road and will be a much needed addition for his district in order to reduce insurance premiums.
4. President Johnson informed the membership that when completing Training Reports it was important to document your training specifically to the applicable standards. Use IFSTA Manuals or applicable NFPA training standards. In other words if you are doing Ladder Training be specific on what you trained.

### Definitions

**Activity Area** – the actual incident area. This space is reserved for and occupied by the operating forces.

**Advanced Warning Area** – upstream roadway area where early warning devices will be placed and used to warn and slow approaching traffic.

**AHJ** – Authority Having Jurisdiction

**Buffer zone** – shoulder of the road or area adjacent to the roadway out of the line of traffic.

**Downstream** – the direction to which the traffic flow is going.

**Temporary Traffic Control Device** – any piece of equipment used to control the traffic flow. These include traffic cones, flares and signage (stop/slow, advanced warning, digital).

**Termination Area** – the area after the Activity Area where traffic merges back to the normal lanes of travel.

**TIMS** – Traffic Incident Management System

**Transition Area** – roadway area where traffic will merge away from the lane where the incident resides to other lanes of traffic.

**Upstream** – the direction from which the traffic flow is coming.

**DRAFT-3**

## **1.0 Purpose**

To formulate guidelines for establishing safe roadway incident working areas that are free of vehicular traffic hazards, that allow operating forces freedom of movement and facilitate safe, controlled and restricted vehicular traffic flow.

## **2.0 Scope / Implementation**

This guideline applies to operations on any roadway; highway, primary and secondary roadways. Regardless of speed, travel frequency, rural or urban setting and incident duration, TIMS should be utilized to provide effective safety measures for our operating personnel. Wherever a fire department operates with vehicular traffic present, TIMS should be employed. It should be implemented county-wide to ensure all fire departments are establishing safe working areas in a consistent manner.

## **3.0 Responsibilities**

**3.0.1** The AHJ should ensure that all their members are trained in accordance with the above listed references. This will not only enhance firefighter safety, but also increase department interoperability when working at a multi-unit incident involving roadway operations.

### **3.0.2 Incident Commander**

**3.0.2.A** Should establish TIMS at incident scenes located on public means of travel. Fire apparatus should be used to block traffic lanes to create safe work zones and activity areas.

**3.0.2.B** Should include TIMS in his/her size up and assign assets accordingly.

**3.0.2.C** Should coordinate and integrate other agencies into TIMS (law enforcement, DOT and towing companies).

**3.0.2.D** Should designate assets to form the four main components of the TIMS areas:

**3.0.2.D-1** Advanced Warning Area

**3.0.2.D-2** Transition Area

**3.0.2.D-3** Activity Area

**3.0.2.D-4** Termination Area

**3.0.2.E** Should designate a safety officer whose duties will include supervision and enforcement of the TIMS area.

**3.0.2.F** Should complete and terminate operations as quickly as possible to remove emergency responders from the roadway and allow normal traffic flow to resume.

**3.0.2.G** Should notify all appropriate agencies of traffic flow restrictions, anticipated time of the operation and estimated incident termination time. These agencies include, but are not limited to law enforcement (SHP, CCSO, FPD), NCDOT, fire dispatch (county or city), and Emergency Management.

**3.0.2.H** During operation in periods of darkness or low visibility, the IC should control light usage (tower lights, warning lights, apparatus brow/brim/side lights) to reduce the potential for driver blinding and attraction.

**3.0.2.I** The IC should request mutual aid resources to assist in establishing TIMS.

### **3.0.3 Supervisors / Line Officers**

**3.0.3.A** Should consider TIMS in their initial size up.

**3.0.3.B** Blocking positions for apparatus should be coordinated, designated and emplaced to secure the activity area.

**3.0.3.C** Should ensure all operating personnel work in two-firefighter elements, have adequate reflective garments and have flashlights for night operations.

**3.0.3.D** Should utilize traffic control devices (cones, flares, Stop/Slow signs and if available, early warning signs) to form the four (4) major TIMS areas (listed above), and to control traffic flow.

### **3.0.4 Personnel**

**3.0.4.A** Should operate solely within the Activity Area unless directed otherwise.

**3.0.4.B** Should work in teams of two when operating on roadways. One firefighter should observe oncoming traffic while the other emplaces temporary traffic control devices.

**3.0.4.C** Teams should move along the roadway buffer zone to points where temporary traffic control devices should be emplaced. At these points and under observation of the other team member, the firefighter should move into the lane of traffic to emplace the temporary traffic control device. When emplacement is complete, the firefighter should move back into the buffer zone and move to the next point to emplace additional temporary traffic control devices.

**3.0.4.D** Temporary traffic control devices should be recovered in a similar manner.

**3.0.4.E** When their assigned operation is complete, teams will report the status to the IC.

### **3.0.5 Safety Officer**

**3.0.5.A** Should be responsible for overall safety at the incident scene.

**3.0.5.B** Should ensure the TIMS areas are established, monitored and enforced

**3.0.5.C** Should ensure all personnel are wearing adequate reflective equipment.

**3.0.5.D** Should restrict personnel movement outside the Activity Area unless deemed necessary by the IC or dictated by the operation.

## 4.0 Training

**4.0.1** TIMS training is available within Cumberland County. A train-the-trainer program was conducted in 2014 producing sufficient trainers throughout the county who are available to train our firefighters, EMS personnel and towing operators.

**4.0.2** Coordination can be made through the Chief's Association for instructors.

**4.0.3** Respondersafety.com provides online training covering all TIMS aspects. The training is completely online and tested with a certification provided. Each member enrolls in an individual program that allows completion of up to fourteen (14) modules.

**4.0.4** Recommended Respondersafety.com modules include:

**4.0.4-A** *Advance Warning*

**4.0.4-B** *Blocking Procedures at Roadway Incidents*

**4.0.4-C** *Intro to Fire Service Traffic Control Professional*

**4.0.4-D** *Move It or Work It*

**4.0.4-E** *Safe Fire Service Traffic Control Practices*

**4.0.4-F** *See and Be Seen: Emergency Lighting Awareness*

**4.0.4-G** *Special Circumstances: Safe Operations for Vehicle Fires*

**4.0.4-H** *Traffic Incident Management: Model Practices and Procedures*

**North Carolina State Firemen's Association Legislative Day****May 5, 2015, 5:30pm: Fire Service Hosted Legislative Reception****May 6, 2015, 9:00am: Fire Service Legislative Day**

On behalf of the board and staff of the North Carolina State Firemen's Association, I would like to invite you attend the 2015 NCSFA Legislative Day. Having our membership in uniform in the halls of the legislature sends a very positive message and is an impressive site.

On May 5th we will enjoy a hosted seafood reception and have some informal fellowship with our legislators and fellow firefighters from across the state. Then on May 6th, *we will meet on the red steps of the Legislative Building at 9am for our annual photo* and then we will spend our day in the halls of the legislature visiting with members of the House and Senate asking them for support for the bills that affect our membership. Without the support of each of our members we could not be as successful as we have been legislatively in the past year.

We have made great strides and will continue to do great things for the North Carolina Fire Service with your continued support. I really hope to see you in Raleigh in May and bring someone with you. The more support we have, the better we can be heard.

Stay safe and God Bless,  
John Grimes, President
